Opis produktu

3M™ Double Coated Urethane Foam Tape 4016 .

M™ Double Coated Urethane Foam Tape 4016 is a 1/16 in. thick tape manufactured with 3M™ Adhesive 100 for a strong, permanent bond that works well with the open cell foam structure to produce high shear strength. This tape offers an ideal solution for a wide selection of bonding issues on various surfaces. This includes both interior and exterior applications where the tape will be protected from the environment.

Details :

- Off-white, 0.0625 in. (1.6 mm) open-cell, flexible urethane foam carrier fills gaps and helps bond to irregular surfaces .
- High shear adhesive with high temperature resistance .
- Durable foam is ideal for interior mounting applications Ideal for bonding, attaching, and mounting .
- The foam dampens and prevents vibration .
