Cena netto	<b>853,70 zł</b>
Kod producenta	<b>550047782</b>
Kod EAN/Wewnętrzny	<b>2693995000001</b>

### Opis produktu

**AeroShell Turbine Oil 3** is a 3 mm<sup>2</sup>/s mineral turbine oil blended from mineral base stocks to which an anti-corrosion additive has been added.

**Applications:** AeroShell Turbine Oil 3 was developed for early pure jet engines and is still approved for some versions of these engines plus the Turbomeca Astazou, Artouste, Turmo, Bastan and Marbore engines. AeroShell Turbine Oil 3 is widely used for inhibiting fuel systems and fuel system components during storage. AeroShell Turbine Oil 3 is an analogue to the Russian Grade MK-8 and can therefore be used in engines which require the use of MK-8. It is also used as the mineral turbine oil component in the mixture of mineral turbine oil and piston engine oil used in Russian turboprop engines.

**Specifications:** U.S. - n/a, British - approved DEF STAN 91-99, French - equivalent to AIR 3515/B, Russian - analogue to MK-8, NATO Code - O-135, Joint Service Designation - OM-11.

**Quantity:** Pail à 20 liters
