Kod producenta	4112
Kod EAN/Wewnętrzny	5900005054105

Opis produktu

Write your own air adventure using our new airline line of bags named for the authors of the fist aviation. This leather travel bag is made by hand with a whole-grain South American beef leather in the color of a bronze espresso with contrasting black leather pocket flaps. Uncoated in order to obtain genuine appearance and wear, they will become more flexible with age and use, while taking a rich patina. Each skin has its own characteristic self-healing and markings, so that each bag is as unique as the remote control that owns it.

By taking the traditions of the past, Lightspeed air bags are also born with the same air orientation that we introduce into our headsets and contain insightful functions designed for the contemporary pilot, such as specially designed pockets for headsets, iPads and transmitters-receivers and sturdy, but rugged, wings-friendly, textured bottoms of PVC. Anyone who owns the Lightspeed headset will recognize the beauty, durability and ingenuity of the product, which will make flying more enjoyable for many years.
