ARDROX 396/1E8 , CORROSION PREVENTIVE , AEROSOLS 300ML

Cena brutto	174,73 zł
Cena netto	142,04 zł
Kod producenta	ARDROX_396_1E8_300

Opis produktu

Ardrox® 396/1 E8 is a blend of surfactants, corrosion inhibitors and oil in a petroleum-based solvent. It is designed to have excellent dewatering and penetrating properties and will leave a thin, oily film on articles to which it is applied. This film will impart good corrosion protection. Ardrox® 396/1 E8 is not recommended for outdoor storage protection. Other Ardrox® products, e.g. Ardrox® 3140, are available for long-term protection outdoors.

Approvals :

- CFMI CFM56
- Dassault Aviation DGQT 1.7.0.103
- Eurocopter SPM, ECA-L 3071
- SNECMA DMR 75-609

Typical use :

- Dewatering and temporary corrosion protection after pickling
- Temporary protection in inter-stage fabrication and storage of parts, sub-assemblies, dies and tools
- Penetrating fluid for freeing seized components
- Restoring wet electrical equipment to working order without the necessity for drying out
- Preservation of gas turbine compressors
- Maintenance protection of on-site plant and equipment
