Opis produktu

Ardrox 3965
Water displacing corrosion preventative

ARDROX 3965 is a blend of surfactants, corrosion inhibitors and oil in a petroleum-based solvent. It is designed to have excellent dewatering and penetrating properties and will leave a thin, oily film on articles to which it is applied. This film will impart good corrosion protection.

ARDROX 3965 is not recommended for outdoor storage protection. Other ARDROX products, e.g. ARDROX 3302/3140, is available for long-term protection outdoors.

Uses :

- Dewatering and temporary corrosion protection after pickling.
- Temporary protection in inter-stage fabrication and storage of parts, sub-assemblies, dies and tools.
- Penetrating fluid for freeing seized components.
- Restoring wet electrical equipment to working order without the necessity for drying out - Preservation of gas turbine compressors.
- Maintenance protection of on-site plant and equipment
