### Opis produktu

The RedBaron Mini™ is a cousin to the RedBaronXP™, the world's smallest and brightest total coverage LED anticollision light. The new RedBaron Mini™ resulted from requests by high-performance racing aircraft, super lightweight UAVs in the defense industry, and aircraft/helicopter manufacturers who wanted an upper and lower anti-collision light due to mounting area constraints. The answer came in this incredible new light, only 27 mm high and only 110 grams in weight. Exceeding all TSO intensity requirements and all DO-160F environmental requirements, the RedBaron Mini™ is now the world's smallest anti-collision light.

Amp draw is 0.375 amps (1.85 amps peak)

For Experimental Use Only

### Features

- Unbreakable Diamidium™ encapsulation
- 9-32 Volt Input Range
- Vibration Proof
- Waterproof
- Lowest Drag Profile anticollision light
- Anodized aluminum finish
- Extremely light weight
- Limited Warranty - Product must be registered within 30 days of purchase [Here](#)
