Concorde RG-380E/53K Sealed Lead Acid Aircraft Battery

Cena brutto **23 434,41 zł**

Cena netto **19 052,36 zł**

Kod producenta **RG-380E/53K**

Opis produktu

Overview

Concorde recombinant gas (RG Series) valve regulated lead acid (VRLA) batteries for engine starting, emergency / essential power, and standby power applications are constructed with cutting edge Absorbed Glass Mat (AGM) technology. Concorde's proprietary PolyGuard Microporous Polyethylene Separator shields the positive plates against shorting, shock or vibration. No other manufacturer offers this dual layer insulation protection feature.

Since 1986, Concorde recombinant gas RG Series AGM-VRLA batteries have been adopted by the majority of military and corporate users worldwide for all types of aircraft.

RG-380E/53K is a fire resistant powdered coated aluminum container & cover with side vent tubes. Temperature Sensor mounting pad in front, fabric lifting straps and hold down bar on the cover.

NOTE - The STC for some aircraft is available at an additional cost please call 877-4-SPRUCE (777823) if applicable to your aircraft.

Features

- Certified battery for turbine and piston engine aircraft models
- Certified nickel cadmium battery replacement in many aircraft
- Superior starting power
- Reliable essential power in the event of a generator failure
- Low impedance design
- Maintenance free
- Constructed with non removable vent valves - no addition of electrolyte or water required
- Aerobatic: Non spillable at any altitude or attitude
- Factory tested to assure airworthiness
- Shipped fully charged
- RG Series batteries ship HAZMAT EXEMPT
