Concorde RG-380E/60LH Sealed Lead Acid Aircraft Battery

Cena brutto	34 434,29 zł
Cena netto	27 995,34 zł
Kod producenta	RG-380E/60LH

Opis produktu

Overview

Concorde recombinant gas (RG Series) valve regulated lead acid (VRLA) batteries for engine starting, emergency / essential power, and standby power applications are constructed with cutting edge Absorbed Glass Mat (AGM) technology. Concorde's proprietary PolyGuard Microporous Polyethylene Separator shields the positive plates against shorting, shock or vibration. No other manufacturer offers this dual layer insulation protection feature.

Since 1986, Concorde recombinant gas RG Series AGM-VRLA batteries have been adopted by the majority of military and corporate users worldwide for all types of aircraft.

RG-380E/60LH is a fire resistant powdered coated aluminum container & cover with side vent tubes. Temperature Sensor mounting pad in front, fabric lifting straps and hold down bar on the cover.

NOTE - The STC for some aircraft is available at an additional cost please call 877-4-SPRUCE (777823) if applicable to your aircraft.

Features

- Certified battery for turbine and piston engine aircraft models
- Certified nickel cadmium battery replacement in many aircraft
- Superior starting power
- Reliable essential power in the event of a generator failure
- Low impedance design
- Maintenance free- no addition of electrolyte or water required
- Internal AC Heater - 115VAC
- Internal DC Heater - 28VDC
- Non spillable at any altitude or attitude
- Factory tested to assure airworthiness
- Shipped fully charged and ready to install
- Manufactured with absorbed glass mat separators (AGM)
- Fire resistant powder coated aluminum container and cover with stainless hold down bar
- Side vent tubes, temperature sensor mounting pad
- Concorde aircraft batteries rated for engine starting may be used for emergency power
- RG Series batteries ship HAZMAT EXEMPT
