Cena netto	593,75 zł
Numer katalogowy	21670787
Kod producenta	D4P_Airliner
Kod EAN/Wewnętrzny	724754200560

Opis produktu

This elegant and gracefully designed pilot case AIRLINER is made of strong and ecofriendly recycled nylon fibre. The result is a light weight flexibility, paired with a high load-carrying capacity. It was designed in cooperation with professionals and its new concept has been accordingly enhanced.

With its trolley handle and the four high-quality exchangeable wheels you can carry it effortlessly even over long distances.

Another advantage: you can pull off two wheels therefore it cannot roll away anymore in the cockpit.

The front case is the perfect organizer, all small items (pens, mobile, glasses, spare batteries, charging cables, ID cards etc.) can be stored and taken out easily. It can be locked by attaching an extra padlock through the eye of the zipper puller.

There are two outer side pockets that can be used for storage, also penholders and a removable key holder. Above the left pocket there is a name plate, so that the pilot case can be identified and returned to its owner if lost.

On the back you can find a fastening loop to carry the Airliner on top of another trolley. The main case can be secured with two combination locks. On the underside of the main lid there are elastic straps to store items such as cables, pens, batteries, torches etc.

In the large main compartment, there is a Velcro fixed laptop bag which can be taken out and fixed on the Airliner trolley so you have more storage space inside.

The equipment shown in the picture is sample and is not part of the offering.
