Opis produktu

The ELT ME406 from Artex will give you peace of mind on every flight. ME406 is one of the output ELT transmitters, which was created so that its installation was most facilitated. Thanks to the battery of the 6-year life expectment ME406 is an ELT, on which you can rely. If you ever have to activate the transmitter, the ELT sends a coded signal at 406 MHz every 50 seconds to warn the emergency services and inform them of your exact location, so that even in the most difficult situation you will find yourself safe at home.
