Opis produktu

Overview

Model NB500 - Extreme Duty **Quick release bracket for 5.0" diameter fire extinguishers**

Typical use: Cockpit/Cabin/Cargo Bay Speed is critical when deploying a fire extinguisher. Count on our new Extreme Duty quick release fire extinguisher brackets to allow fast action while withstanding rigorous use. Though not certified for use on aircraft, it is ideal for experimental aircraft, terrestrial and marine applications.

Tough, Functional & Lightweight

- Fire extinguisher quickly releases from bracket
- Fiberglass reinforced nylon construction and corrosion resistant hardware
- Designed to meet MIL SPEC 810G (test in progress)
- Tested to withstand inertial loads in excess of 27G in all directions
- Fire extinguisher cannot be accidentally disengaged from bracket
- Fits H3R Aviation fire extinguishers with 5.0" diameter cylinders ([B369](#) & [B371](#))
- "Pull to Release" flag enhances visibility
- Does not obscure fire extinguisher nameplate
- Weighs a scant 16 oz, nearly 3 lb. lighter than bracket model 809!

Note: Bracket only. Extinguisher not included.
