Opis produktu

Specially developed by LIQUI MOLY for airplanes and helicopters. The aircraft are exposed to extreme weather conditions, high UV loads and the corners of AVGAS, MOGAS, JETFUEL and the remnants of smoke oil. In addition, they are often kept on the outside for a long time. This difficult weather leaves a mark. LIQUI MOLY AERO Paint Restoration: Refreshes even lightly the lacquer of the aircraft, removes the typical residues from flying in the same operation and gives a new gloss to all painted surfaces. Not only is it a pleasure in its own plane, but also helps to preserve the value of the Nadaje new shine to all the painted surfaces Without silicone Suitable for GFRP and CFRP aircraft (including gliders) Helps to keep the value of the machine Suitable for the smoothness of the UV-tested plastics at the height Suitable for the polishing machines Packaging for maintenance objects and marketing partners: 6 pcs. LIQUI MOLY AERO hair paint has been specially adapted to the needs of general aviation.

Content: 500 ml
