MGL STRATOMASTER VEGA 2-1/4" ASI / VSI

Cena brutto	2 584,71 zł
Cena netto	2 101,39 zł
Numer katalogowy	21672229
Kod producenta	ASV-1
Kod EAN/Wewnętrzny	5900016954104

Opis produktu

The ASV-1 is a 2 1/4" - 57mm sunlight readable encoding altimeter, airspeed and wide range vertical speed indicator.

The altimeter contains an internal high accuracy 24 bit digital altitude sensor which calculates altitude from -1000 ft up to a maximum of 35000 ft. The ASV-1 outputs various formatted RS232 serial data protocols compatible with serial input transponders such as that from Garmin, Magellan, Northstar, Trimble, Microair etc. The altimeter can display altitude in feet or meters and local pressure can be set in millibars or inches of mercury.

The VSI indicator can be displayed in either feet/minute (ft/min) or metres/second (m/s). The VSI can be calibrated by the user once the instrument has been installed in the aircraft.

Pitot and static ports can be connected to the aircraft system.

The ASV-1 instrument measures airspeed from 16mph to 250mph and is well suited to slower aircraft due to very good sensitivity and linearity at low air speeds.

Airspeed can be indicated in statute miles per hour (mph), kilometers per hour (km/h) or nautical miles per hour (kts).

The ASV-1 also provides a programmable Vs and Vne airspeed alarm output.

ASI sensitivity can be calibrated by the user to cater for errors caused by pitot tube placement.

In addition, the ASV-1 provides an encoder test function, flight timer since takeoff and records the maximum airspeed reached.

The ASV-1 provides a parallel Gillham code interface when used in conjunction with the MGL Avionics CNV-ALT.
