-EXPLORE NEW REGULATIONS FOR AIRCRAFT REGISTERED BY EASA TRANSPORT PLB AND TECHNICAL LOG BOOK

With 5.4 ounces and a weight of just 4.5 inches, ResQLink + is both a small and vibrant personal localization torch. Small enough to wear it in your pocket, pin it on the backpack or hide in an inflatable life jacket.

With three levels of integrated signal technology-GPS positioning, a strong 406 MHz signal and 121.5 MHz-ResQLink + [™], it quickly and accurately delivers your position to the global network of search-and-rescue satellites. The built-in stroboscopic light provides visibility during nighttime installments.

PLB tests have been checked and tested in the most remote locations and treacherous conditions in the world. Ask about 400 pilots, sailors and explorers from the province, who were rescued by the PLB during a rigorous test program in Alaska. On the basis of the results of the tests, the federal government in 2003 It has approved the use of PLB in the United States.

Even under extreme conditions and ResQLink + situations, it is easy to activate. Just spread the antenna and press the ON button. Thanks to the powerful 66-channel GPS receiver, ResQLink + [™] conducts rescuers at a distance of not more than 100 meters. Search and rescue personnel are usually notified of your position in just five minutes using a GPS-enabled PLB, such as ResQLink +.

Two built-in tests allow you to routinely verify that ResQLink + is working and is ready to use-one touch of a button can be easily tested for internal electronics and GPS functions.

Resilient

- No subscription fees
- Super Bright LED Strobe
- Built-up 66-channel GPS
- Autotter and GPS test functions
- Typical performance 30 hours
- Battery other than Hazmat
- Made in USA

If you use it ... we replace it free of charge. Just send your story to our Survivor Club link, send us your used lantern so that we can install it on the Wall of the Sława, and we will send you a completely new lantern of equal or greater value. Users from the UK-remember to register your PLB here
