Opis produktu

The Fta-250L is a Japanese manufacturer's response to a compact radiotelephone manufacturer "per pocket", but without sacrificing the quality of the device itself. This model is designed to be used by the work. new provisions concerning the change in the width of the inter-channel spacing of 25Khz on 8.33Khz. It is dedicated to a user with less money and for people who do not need additional options that give higher models. It also works perfectly as a basic radio for ground handling in need of a tool for work.

Note: If a Product is not available in stock, it may be subject to long execution terms
