RAMI AV-590 Antenna Duplexer Switch V 50 Ohms

Cena brutto	1 843,91 zł
Cena netto	1 499,10 zł
Kod producenta	AV-590

Opis produktu

Overview

The AV-590 allows two communications radios to share the same antenna. In the nominal, non-switched mode the AV-590 splits the signal from the antenna evenly between two comm radio receivers. When the control voltage is activated by the microphone PTT, the AV-590 switches the antenna to the corresponding radio transmitter and isolates the other receiver.

Specifications

Model	AV-590
Application	Combiner
Ports	Antenna XMT/RCV XMT/RCV
Frequency	118-137 MHz
Impedance	50 Ohms Nominal
VSWR	1.2:1 Max
DC Voltage	12-15 VDC @ 60 mA Max
Receive Insertion Loss	less than 0.6 dB above 3.0 dB
Transmit Insertion Loss	less than 0.3 dB
Isolation	greater than 30 dB
Connectors	◆BNC◆ Female
Cable	36" long, 4 conductors
RF Power Capacity	25 Watts TX
Max. Weight	0.50 lbs.
Color	Black
