Kod EAN/Wewnętrzny	5900000004198

Opis produktu

PRODUCT DESCRIPTION:

The composite base of the suction-lock suction cups consists of an 83 mm rubber bowl, which is connected to (RAP-B-238), a diamond plate connector.

The suction cup is designed to provide extra strong hold on any smooth surface, but for the best result, attach the suction cup on the glass.

If the space on which you want to mount is not smooth and non-porous, self-adhesive support may be helpful.
