Opis produktu

This is the fourth edition of the Visualized Flight Manoeuvres Manual for the higheres provides excellent educational and didactic assistance for instructors and students, covering all the flight manoeuvres required to obtain a Private, Sports, Commercial Certificate and Air Instructor certificate. Each manoeuvre is described in detail depending on the type of aircraft on which the lesson will take place, determines the purpose of the task and lists the required standards of practical tests. Fully illustrated paginated pages, which show the completion of each maneuver on a one-page schedule, so readers absorb all the visual/text information at once.

This manual of manoeuvres, updated to current practical test standards, including emergency descent and accelerated drag, is easy to transfer thanks to spiral opravification, which provides convenient access to the distributed pages. The illustrated schedules show every maneuver step by step so that the pilots understand what they should look for outside the cockpit window. It contains a complete description of the drains, slips and reference manoeuvres to the ground, as well as short, soft and lateral takeoffs and landings. There are also suggested checklists for everything from initial inspection to take-offs and landings, performance and control, and an easy-to-use index so pilots can quickly appeal to any desired task.
