Opis produktu

Mitigate overheating with this self-contained mount!

Apple iPads mini are amazing devices for pilots, but they can easily overheat - especially in direct sunlight. This ingenious new mounting system solves this persistent problem, with built-in fans to circulate cool air, specifically targeted at the iPad's mini main hot spots. Leave your iPad mini mounted on the yoke or window and never worry about a sudden shutdown again.

X-Naut Cooling Case for Apple iPad mini 6 features:

- Powered by 8x AA batteries or micro USB cable
- Battery test button shows status of batteries
- Spring loaded latch makes loading your iPad mini easy and secure
- Avionics grade fans make little noise and move plenty of air
- Weighs only 7 oz. without batteries
- Compatible with RAM mounting systems
- Electronics are dust and moisture resistant

Eight AA batteries provide over 10 hours of use, and the handy battery test button shows the status with a single click. The X-Naut can even be converted to a kneeboard.

Measures (HxWxD): 9.2" x 7" x 1.5".

Compatible with iPad mini 6.
